Step 1 : Setup Your Repeater

Follow the instructions to complete the setup of repeater

Step 2 : Connect Your Device

Connect the LAN port of repeater to the WAN port of wired device

3 AP (Access Point) Mode

Step 1: AP Mode Setting

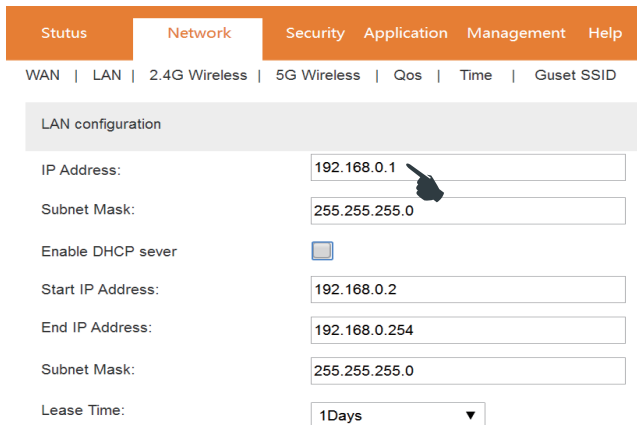

Before Installation Please complete the following settings:

1. Connect a computer to the Juplink router and launch a web browser.

2. Visit <http://192.168.0.1> you are prompted to enter a username (admin) and password (admin) .

3. Select Network and click LAN
Manually set IP address as the following format 192.168.0.XXX (XXX is any number of 2~254)
Then you need to enter this address to log in to the web UI instead of the default 192.168.0.1

Note:
If the default login credentials do not work, you might have changed the admin password. If you cannot remember your new password, you must perform a factory reset to restore the router to its factory default settings. For more information, see Restoring a Juplink home router to the factory default settings.

Step 2 : AP mode Connection
